

1 Solar Block

“Simplifying Solar for the South” Since 2003

Enabling Homeowners to Purchase Solar Power Systems at Wholesale Prices

If you’ve ever dreamed of going solar but was put off by the cost, then this promotion was made just for you!

How does it Work?

By grouping solar installations in one geographic area and time period, GSS can leverage efficiencies to lower installation and equipment costs – passing the savings on to you!

GSS will come to your neighborhood and give a presentation on how the program works and answer your solar questions. GSS will also consult with each homeowner individually to help them select their “Grid-Tied” or “Grid-Tied with Battery Back-up” system. Participants in the **1Solar Block** purchasing program will then qualify for bulk pricing – the lowest in the state.

How do I sign up?

Just email us at sales@gulfsouthsolar.com and have **1Solar Block** in the Subject line or fill out our online form on our website www.gulfsouthsolar.com (This will not obligate you to purchase anything.)

What types of systems qualify for the discount?

To qualify for the **1Solar Block** bulk discount program, at least five homeowners in your purchasing block must select one of our pre-packaged systems:

- 3kw Grid Tie (sells back energy produced and lowers your electrical bill)
- 2.4kw Grid tie with Battery Back-up (sells back excess energy produced and provides back-up power in times of outages)

Why go with GSS’s 1 Solar Block Program?

- GSS is the most experienced installer in the Gulf South and has more NABCEP certified installers on staff than any other company in Louisiana.
- We have installed solar on more homes than all other Louisiana solar companies combined.
- GSS also has the highest rate of return customers. Nothing speaks higher for a solar installer than to have their customers come back for more.
- We have the best prices.
- GSS is a Distributor, Factory Representative and Authorized Reseller for Solar World modules which produce more kW hours per Watt than any other major brand as confirmed by independent testing by Photon International.
- GSS is a Distributor and Authorized Reseller for Outback Power Systems, the leading designer in power electronics for renewable energy applications (such as inverters).
